

ADRs

Title

ADR 1: Confirmation for creating reviews hub

Context

We want to know if we can create a hub for CU subject and instructor reviews to solve the issue where reviews were sparse.

Decision

- We will interview people for their opinions about online reviews.
- We will decide which tools will be used to create a platform.
- We will learn about microservice architecture.

Status

Proposed

Consequences

Positives

- 8 out of 10 interviewees agreed that creating a hub for course review will solve this issue.
- We made an appointment for a future meeting about tools and architecture used for this software.

Negatives

- We may have a problem with defamation law, since students might criticize the instructor and unjustly harm their reputation.
